During all this period the Government has been squeezing from the taxpayers \$100,000,000 a year in excess of its needs. Such an injustice was never known before in the distory of civilized governments.

Both political parties have pledged themselves to stop this surplus by abating the taxes that produce it. The Democratic Convention in this State demanded that it be done " straightway."

" Straightway " let it be.

## "WHEN DOCTORS DISAGREE."

A quarrel among physicians seems to be inevitable in the case of every prominent patient. It was so with GARFIELD and GRANT, and now the Crown Prince has to endure a professional squabble in addition to his cancerous affliction.

When his doctors disagree, however, Unser Farra takes his own case in hand. He sits and con. He orders the opposing physicians s out briefs, examines the decides the matter himself.

There is a touch of Hohenzollen fortiande in this that commands admiration.

## THE GOOD OF ALL.

President CLEVELAND did well to remind the members of the Chamber of Commerce. in his patriotic letter to its committee, that selfishness in political action is very apt to defeat its own ends.

"Interdependence," he wrote, "is so fully an element in our national existence that a patriotic and generous heed to the general good seems to best subserve every particular interest."

In other words, the highest good of all is the best good of each. This is the ethics of politics. And to its

teaching the President might well have added as timely and pertinent the admonition in his Inaugural Address, that "the best results in the operation of a government wherein every citizen has a share largely depend upon a proper limitation of purely partisan seal and a correct appreciation of the time when the heat of the partisan should be merged in the patriotism of the citizen."

### FOUR CIVILIZERS.

GROBGE WILLIAM CURTIS gave a new grouping of the agents of civilization in his eloquent address last night.

"The Bible, the teapot, the spelling-book and the bath-tub," he said, have been the

pioneers of progress on this continent. No Anarchists, it is safe to say, were ever evolved from this combination. The gridfron came later, but it is also a great aid to civilization.

### TWO REMEDIES.

That was a very suggestive picture which CHAURCEY DEPEW drew of the owners of our surplus manufactures " sitting on their treasures and gazing upon the ocean with some thing of the helpless wonder of the simple aborigines who first roamed these States."

Mr. Dapaw's remedy for this glut of unsold goods is to subsidize steamships to carry it to foreign markets.

What good would that do, with the cost of our manufacturers' raw materials and machinery so enhanced by tariff charges that they cannot sell in competition with rivals who are not thus handicapped?

Obseper raw materials and untaxed machinery and vessels would soon restore to

this country its merchant marine and open to it the markets of the world.

### THE MINORITY RULES.

Boss PLATT and his lieutenants, though six times repudiated by the people of this State, are still in control of the Legislature, and met vesterday to pick out the henchmen who should serve as its officers.

This gross subversion of the rule of the majority is accomplished by denying to the people the reapportionment of legislative districts according to population which the Constitution prescribes.

By this denial two Republicans in the interior are given as much power as three or AVERAGE PER DAY FOR THE ENTIRE four Democrats in this city and in Brooklyn.

How long will the people tolerate a minority rule by repudiated bosses?

#### HYMEN IN POLITICS.

Genial Joe Hawley has increased not only his quota of happiness but also his qualifications for the Presidency by taking unto himself a charming wife.

By far the most popular act of President CLEVELAND'S Administration was the little ceremony that provided the White House with its captivating mistress.

Secretary Laman got married, and his elevation to the Supreme Bench is imminent.

### NATURE'S PENALTY.

The insanity of the Queen of Sweden is but another instance of the prevalence of mental weakness, eccentricity and imbecility

among the reigning families of Europe. There is hardly a royal name that is not borne by more or less dolts and idiots, who who are for the most part kept in private asylums out of the public gaze.

This is the natural and inevitable result of the pernicious system of intermarriage among the reigning houses.

Nature is no respecter of royalty.

## A LESSON IN RESIGNATION.

In these days, when few resign, unless urgently requested to do so by somebody with the ability to remove them, the reasons for his retirement given by President Mo-Cosn, of Princeton, are decidedly refreshing.

He says he does not need or want rest, but resigns "simply and solely because I look on like a judge and hears the arguments, pro it as a matter of duty, considering that at the age of seventy-six my time of usefulness is a fulfil the duties."

But it is altogether too much to hope that a politician, or even a Cabinet officer like Garland, whose usefulness was past at a much earlier age, will imitate the conscientious example of Princeton's able President.

Did THE WORLD have the full particulars of the CARNEY-M'AULIPPE mill? Why, certainly-in its morning extra at 8.30 o'clock. Where were the other papers? Well, they caught up with the procession later on in their evening editions. Q. E. D.

With the coal barons starving their miners into acceptance of pauper wages, and extorting \$6 per ton for coal from consumers, this American industry seems to be revelling in " protection."

each case, but the trustees have had to deal lately with an exhorter whose story of conversion takes such a long time to tell that no one else can speak at the meetings.

The cause of all the trouble is Miss Rebecca Flehn, a maiden lady about forty-five years of age. Every meeting night for the past two months she has risen from her seat at the leader's first invitation, and kept the floor until long after the hour of closing the meeting. The Rev. Mr. Elsing made repeated polite requests for her to stop, but she took no more notice of his protest than if it had been the buzz of a fly. The story printed in THE WORLD that Mrs. Ann Hughes, aged 102 years, was dying of hunger in the rear of 19 Spring street, brought many charitable persons to the house this morning.

Those who came after 9 o'clock found that

other benevolent people had already sup-plied Mrs. Hughes and her niece, Mrs. Mc-Andrews, with enough to buy a good break-sast and build a cheery fire in the stove. Of the first money left by the visitors, Mrs. McAndrews took \$2.50 to Landlord McArdle, McAndrews took \$2.50 to Landlord McArdle, the balance of last month's rent. McArdle refused to receive it, saying he had begun dispossess procedings and would put both women out to-morrow. Then an offer was made to Miss Flehn to submit the matter to arbitration. The trustees suggested Secretary R. R. McBurney, of the Young Men's Christian Association, on their side, and asked Miss Flehn to choose some one to consult with him, the trustees binding themselves to accept any decision arrived at by the two gentlemen. But Miss Flehn was still obdurate. She said that she proposed to attend every meeting and did not want arbitration.

Yesterday Mr. Elsing laid the matter before Justice Gorman at the Essex Market Court. He said that the trustees were at their wits' end, and needed advice badly. Miss Flehn, he said, was a remarkably clever woman, but she was a crank, and would work.

The Evenno World reporter did not interview Mr. Prime. He only conversed with him for a few moments.

It is only to be deplored that Mr. Prime while a patron of the Museum, whom Trustees and public alike must respect for generosity and devotedness, should cherish a yiew not shared by the public, and from which the majority of his fellow trustees are compelled to differ. But when the matter is put to the vote, would it not be a neglect of duty in a trustee to allow consideration for an amiable, generous worker for the Museum to push to the wall the still higher consideration that should be entertained for the will of the public?

When the subject is narrowed down there is nothing, even to the minds of the Trustees, which militates against the Sunday opening except a religious feeling that to go to the Museum on Sunday is wrong, and reasons of expediency.

There is a divine command that the Sabbath day should be sanctified and that on it man should rest from labor, in memory of the Creator's day of rest after the work of creation.

#### The Diminished Membership to be Increased by New Locals.

The organization of so many national trades assemblies has caused such large withdrawals from some of the old district assemblies that the latter have been dwindled down so numerically that they are not so powerful by any means as formerly. District Assembly No. 49, which was once the largest in the order, 100,000 members being on its rolls, has been decimated by withdrawals and

suspensions until its membership is now about thirty thousand. So many skilled workers have left it that So many skilled workers have left it that its membership is mainly composed now of men and women of various occupations. Its energetic leaders have lately renewed their efforts to form new locals of unorganized workers, and they assert that it will not be long before No. 49 will again be the largest and most powerful assembly in the order, while its membership will be of a more permanent kind than heretofore and there will be no necessity for suspensions. The posses. be no necessity for suspensions. The posses-sion of the Pythagoras Hall property gives No. 49 peculiar advantages over all the other

Encouraging American Composers. Frank Van der Stucken's concert at Chickering Hall last evening attracted a large audience, and its American music was evidently greatly appreclated. J. K. Paine's "Spring Symphony," E. A. MacDowell's symphonic poems, "Hamlet" and MacDowell's symphonic poems, "Hamlet" and
Henry Golden Huss's "Rhapsody" for piano and
orchestra, were very creditable performances and
distinctly worthy of attention. The Schubert Vocal
Sciety, of Newark, did capital work in L. A. Russell's "Pastorate," and Miss Ells Earle sang the
soprano part with very agreeable effect. The
concert closed with H. R. Shelley's composition,
''A Dance of Egyptian Maidens." Mr. Van der
Stucken's idea of giving his audiences an evening
of native music promises to be extremely successful.

Policemen Very Busy.

there were twenty-three drunken persons in the lock-up at one time, eighteen of whom were lock-up at one time, eighteen of whom were women and giris. The eider McCullagh mades a raid on the women who nightly parade Fourth avenue. Thirteen of them were gathered into the police net before midnight in the Mulberry street precinct, Patrolman O'Nell found a man who was wildly delirious, and promptly concluded that it was a case of very aggravated drunkenness. He arrested the man, who was Charles Gillen, and arraigned him before the Sergeant. An examination snowed that the prisoner was sick, had a high fever, and was delirious, the was sent to Bellevue. The Sergeant reported that the arrest of Charles Gillen on "suspicion" of being guilty of delirium tremens was dismissed.

## Working Women Organizing.

"Sister" Mary C. Andrews, Ida M. Van Etten, Gabrielie Greeley and Leonora Relliy are making good progress in improving the condition of the working gris and women in this city. The results of the recent meetings in Pytnagoras Hall have been quite successful, and a good nucleus for a local assembly has been obtained. Other meetings will be held from week to week, when the ladies above named will make addresses and assist the young women present in organizing.
